Miki OF THE BRAIN

TECHNIQUE:

© Sagittal TIWI

© Axial Ti, T2 and [HOSPITAL]

* Coronal T2WI

* Diffusion study.

FINDINGS:

* No areas of diffusion restriction (No MRI evidence of recent infarcts)

Bilateral peri-ventricular small patches of high <NRP>/FLAIR signal seen related to the occipital horns of lateral ventricles.

Normal size and parenchymal signal intensity pattern of the cerebral hemispheres, cerebellum and brain stem.

© [NAME] or extra axial \$.0.1s.

« Normal size and configuration of the ventricular system.

© No shift of the midline structures.

¢ No extra-axial collections.

e Intact cranio-cervical junction.

OPINION:

© Bilateral deep. periventricular patches of high T2 signal likely due to delayed myelination or old insult.

Much obliged
